

Facilities Management made easy with our

SIMPPLE ECOSYSTEM SOLUTION

SIMPPLE

SIMPPLE is an advanced technology solution provider in the emerging PropTech sector, focused on helping facility owners and operations managers manage their facilities autonomously. Since its establishment, SIMPPLE has developed a proprietary ecosystem solution that automates workflow and the workforce in areas such as building maintenance, security surveillance and janitorial services.

INSTITUTIONS

ATTENDANCE TRACKING

The SIMPPLE QR doubles up as a feedback form for cleaning/security and attendance form for students/teachers.

INDOOR AIR QUALITY (IAQ)

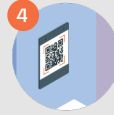

Indoor Air Quality (IAQ) devices provide an accurate reading of the environment, giving actionable insights for a safe and healthy space for occupants.

MULTI-FUNCTIONAL ROBOT

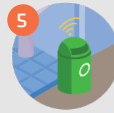

Robots with 2-in-1 capabilities such as Security and Cleaning can send alerts to the supervisor, detect abnormal situation through video analytics and clean up automatically.

OFFICE SPACES

TOILET QR FEEDBACK

QR Feedback in toilets can be scanned by employees to provide real time feedbacks for cleaners to rectify issues quickly.

SMART BINS

Smart bins in offices provides the company with insights and a quicker response to act, while promoting sustainability within the premise.

AUTOMATED CLEANING

The compact phantas 4-in-1 cleaning robot is suitable for automated cleaning in small spaces with the ability to clean under the tables.

HOSPITALS

TELEDOC ASSISTANT

A.I would be able to provide more support in the healthcare industry as well as working with other kinds of robots.

QUALITY ASSURANCE

SIMPPLE's audit functions to ensure that space is kept clean and ventilated, ensuring the environment is conducive for patients and the public.

AUTONOMOUS ROBOTS

The robots are fully integrated with doors and are able to maneuver on their own with ease.

BUILDING SERVICE CONTRACTORS (CLEANING)

SIMPPLE

SIMPPLE is an advanced technology solution provider in the emerging PropTech sector, focused on helping facility owners and operations managers manage their facilities autonomously. Since its establishment, SIMPPLE has developed a proprietary ecosystem solution that automates workflow and the workforce in areas such as building maintenance, security surveillance and janitorial services.

TOILET SENSORS

Occupancy detection and live ammonia measurement in the toilets facilitate on-demand cleaning.

PEOPLE COUNT & OCCUPANCY

To monitor and optimise people flow and space occupancy of up to 16 customise regions, enabling last minute room bookings and optimising office layout.

COMMAND CENTRE

Centralised brain where the command center is located. SIMPPLE Software can be the one-stop solution to visualise the building health in real-time.

TOILET QR FEEDBACK

QR Feedbacks in toilets can be scanned by employees to provide real time feedbacks for cleaners to rectify issues quickly.

SMART BIN

Smart bins In offices enables digital waste management and provides the company with insights to promote sustainability.

SECURITY + CLEANING ROBOT

With an extra pair of eyes on the ground, robots with security features can double up to support the security workforce by trigger alerts and voice commands. Incident reporting will be quicker and more responsive.

INTEGRATED COMMUNICATION

Integrated messaging app services such as WhatsApp to alert cleaners of scheduled or outstanding tasks at hand.

AUTOMATED CLEANING

The compact Phantas 4-in-1 cleaning robot is suitable for automated cleaning in small spaces with the ability to clean under the tables.

OUTDOOR CLEANING

Outdoor sweeping robot can be deployed for heavy-duty cleaning in large sites both indoors or outdoors.
